Data Analytics Officer

SUMMARY

Data Analytics Officer with experience in SQL, Power BI, Python and Excel, building automated reporting and analytics solutions for business and risk portfolios. Experienced in transforming multi-source data into executive dashboards, monitoring FPD2/NPL performance, validating data quality, and improving reporting efficiency.

EXPERIENCE

THUNDER FINFIN CO., LTD. Jul 2025 — Present

Data Analytics Officer

- Build Power BI dashboards that replace manual weekly reporting and reduce reporting time by approximately 40–60%.
- Develop SQL queries using JOIN, GROUP BY and window functions to transform and validate portfolio data.
- Use Python to connect to 3 data servers, transform data and support recurring analytics workflows.
- Monitor FPD2 and NPL performance for the UFUND risk portfolio and prepare executive reporting.
- Validate anomalies and database defects before handing issues to engineers.
- Analyze approval, contract, rework and risk performance across business units and partners.

Estim8 Jun 2023 — Jun 2024

Cost Estimator

- Prepared construction product estimates and takeoffs for Australia and New Zealand projects.
- Worked with Roof Trusses, Floor Trusses, Wall Frames and Engineered Wood Products.
- Performed building takeoffs and translated project requirements into structured cost estimates.

PROJECTS

UFUND Risk Portfolio Dashboard

Power BI · SQL Server · Python · Excel

- Developed risk and portfolio reporting covering AppIn, Approve, Contract, Approval Rate, FPD2, NPL, MOB4/MOB6 and DPD performance, with analysis by CA, student, risk level, age, location and income.

UFUND × COM7 Attach Rate Analytics

Power BI · SQL Server · Power Query · Excel

- Combined monthly branch-level data from multiple SQL Server sources with an Excel BU master to analyze Attach Rate by BU, brand, unit and revenue, including Apple/non-Apple and partner comparisons.

Automated Brand Reporting Workflow

Python · SQL Server · Excel · Google Sheets

- Built an automated reporting workflow that retrieves data from K2 and ITOS, generates student and personal detail/summary Excel outputs, and manages brand-specific recipients from a Google Sheet configuration.

SKILLS

SQL · Power BI · Python · Excel · Power Query · Tableau · SQL Server · Data Analysis · Data Visualization · ETL · Data Quality Validation · Dashboard Development · Reporting Automation · Risk Analytics · Business Intelligence

EDUCATION

University Jul 2018 — Nov 2022

Bachelor of Civil Engineering

GPA 3.22
